

CREATE IBM WATSON IOT PLATFORM AND DEVICE

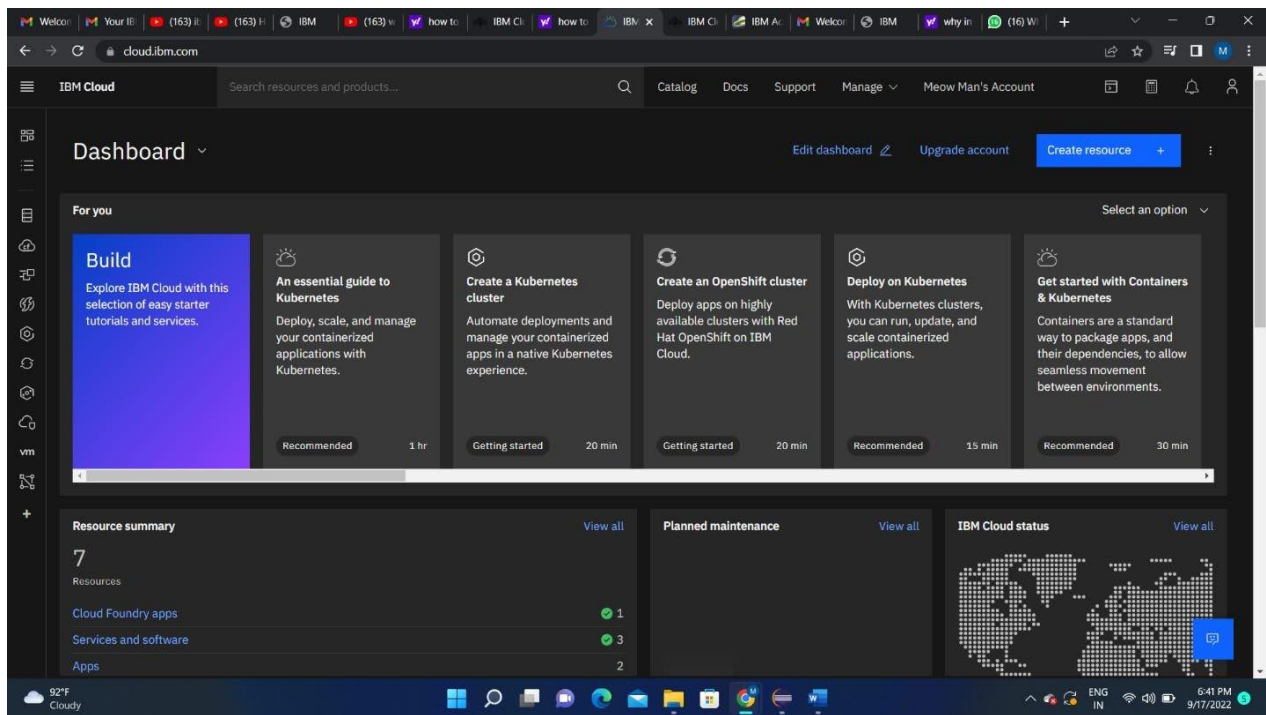

Team ID	PNT2022TMID31883
Project Name	Smart Waste Management System for Metropolitan Cities

STEPS:

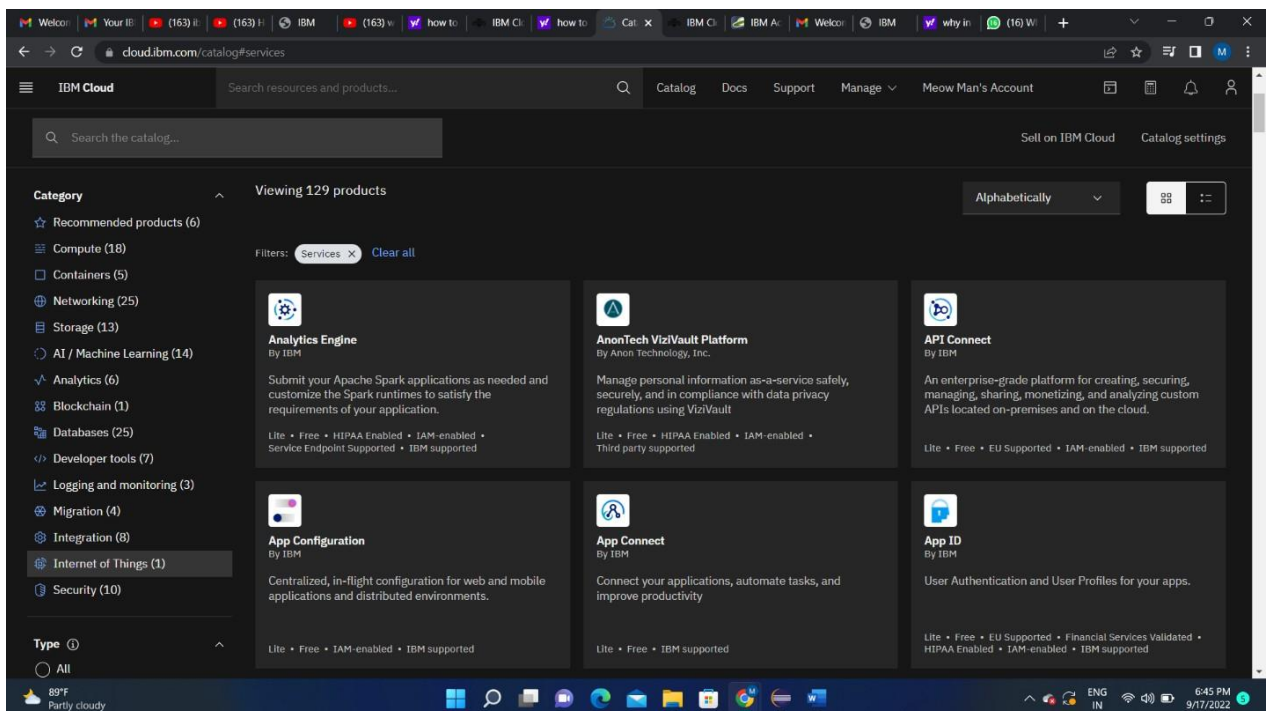

1. Firstly create an IBM cloud account with IBMid and password

2. Home page of IBM cloud

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

IBM Cloud

7. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other servies)

The screenshot shows the IBM Cloud IoT Platform console. The left sidebar has a 'Manage' tab selected. The main content area displays a 'Let's get started with IBM Watson IoT Platform' section with a 'Launch' button. Below this, there's a 'Ready for the next level?' section titled 'IBM Watson IoT Platform Journey' with three options: 'Lite', 'Non-Production', and 'Production'. The 'Lite' option is selected and shows a 'Free' price point.

Manage Plan Connections

Let's get started with IBM Watson IoT Platform

Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.

Launch Docs

Ready for the next level?

IBM Watson IoT Platform Journey

Lite

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

- Free

Non-Production

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

- Starts at \$500 per month

Production

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

- Includes IBM Service & Support

The screenshot shows the IBM Cloud IoT Platform console with the 'Plan' tab selected. The main content area displays the 'Current plan' as 'Lite' and 'Current usage' as 'N/A'. Below this, there's a 'Change pricing plan' section with a table showing the 'Lite' plan features and pricing.

8. Clicking on the launch button in the manage tab, it will open to this

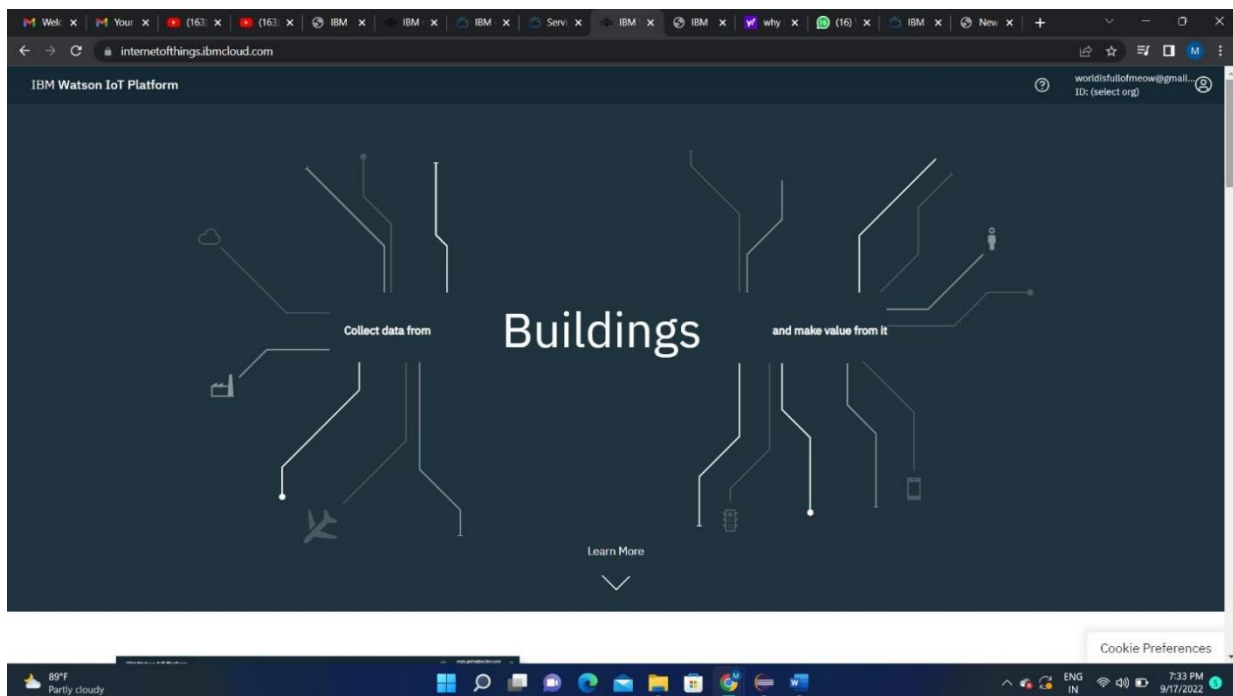

9. Enter the details to sign in to the Watson Cloud to create a device

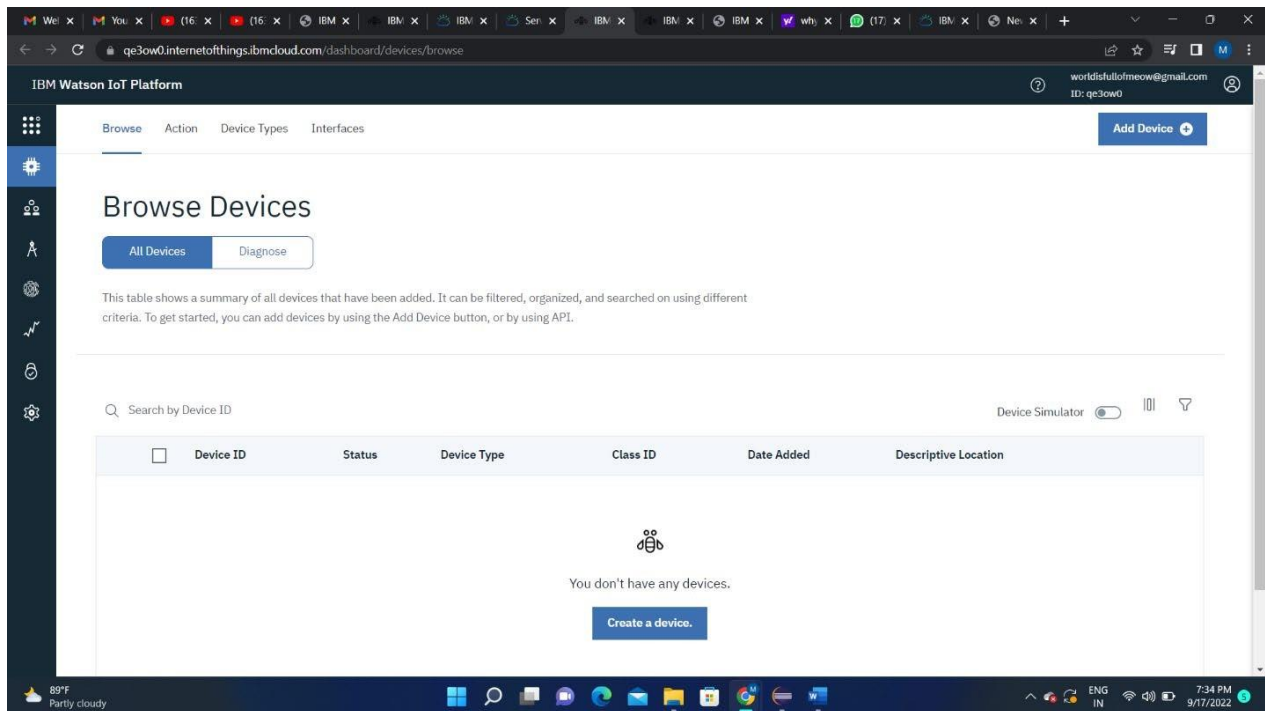

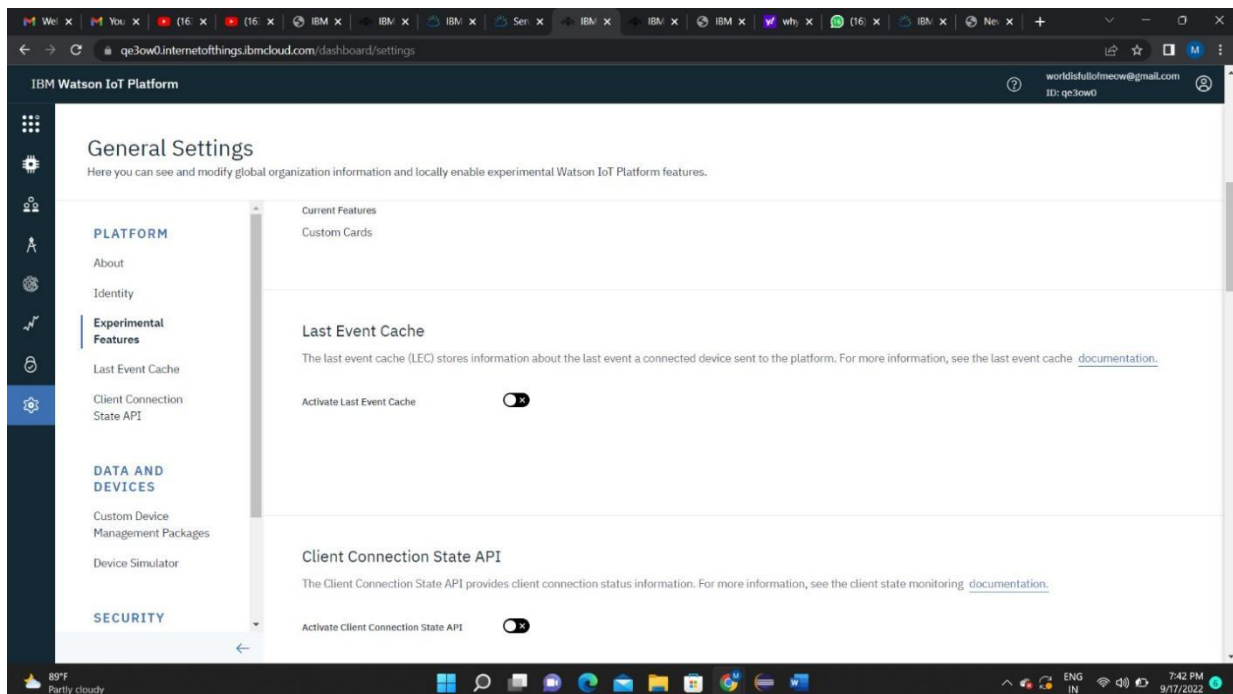

10. Once logged in the name will be displayed and it goes back to the first page

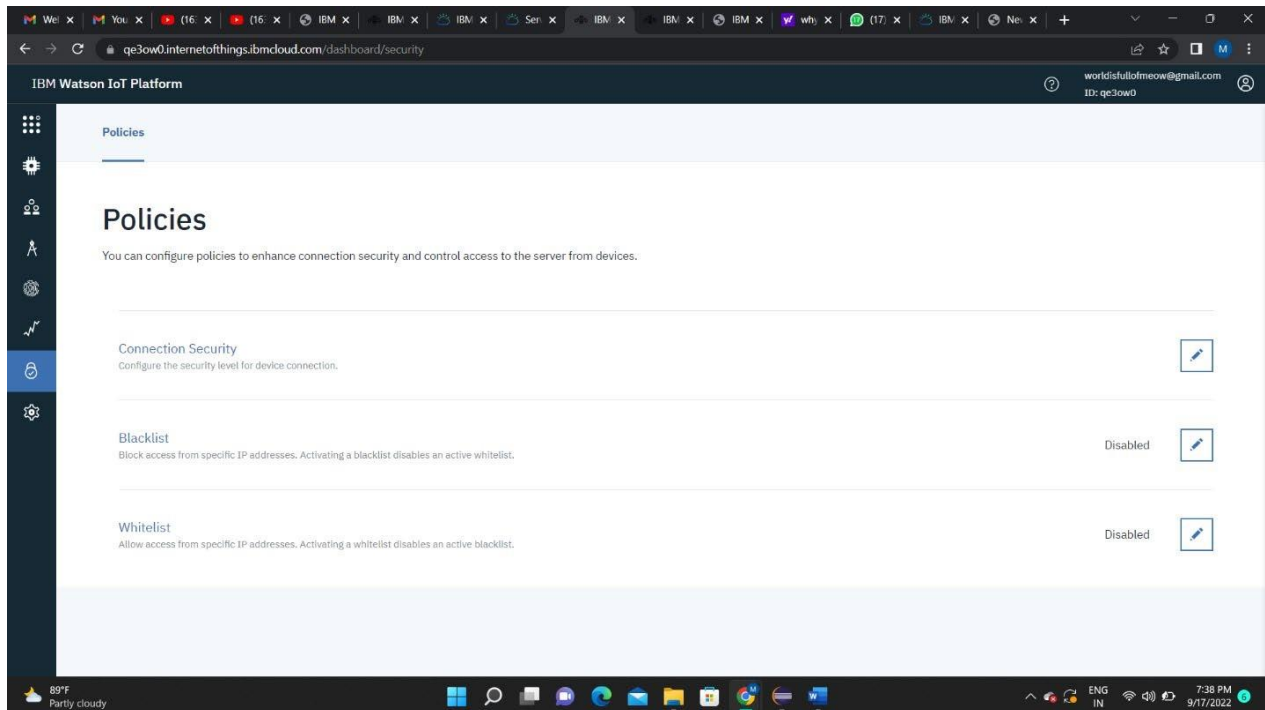

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

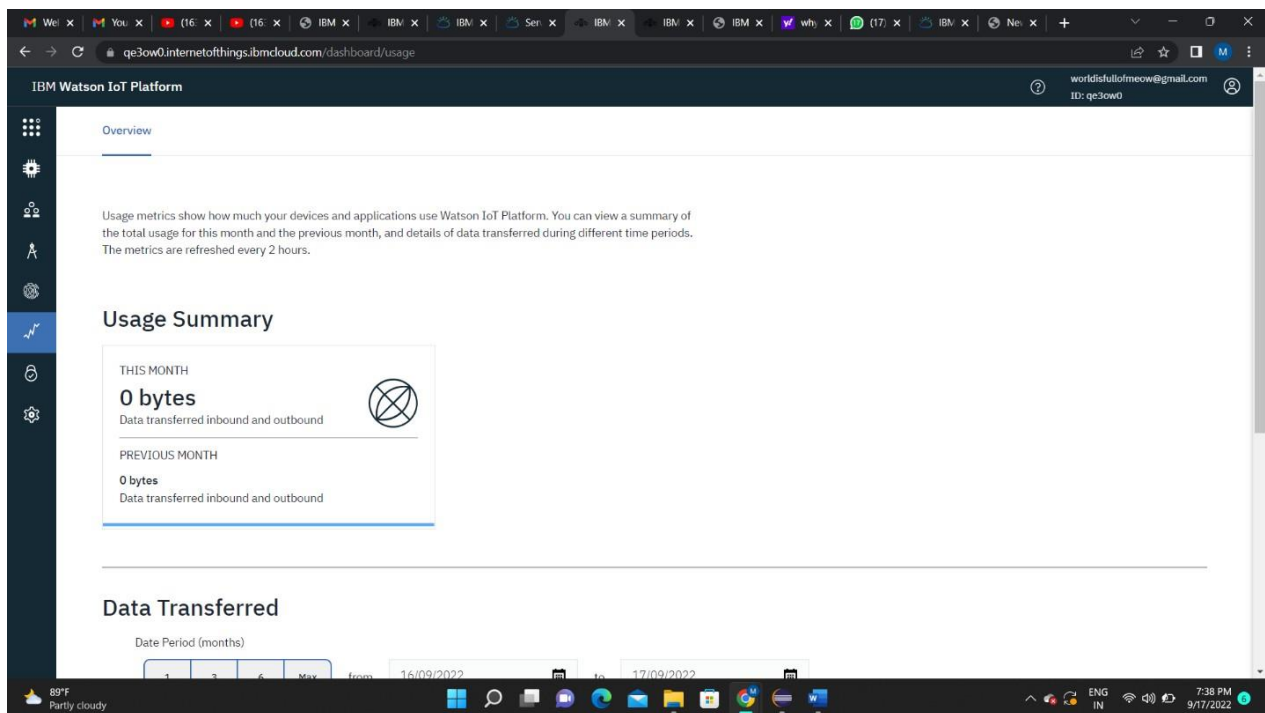

12. The setting tab is used to change the general setting if needed for the project.

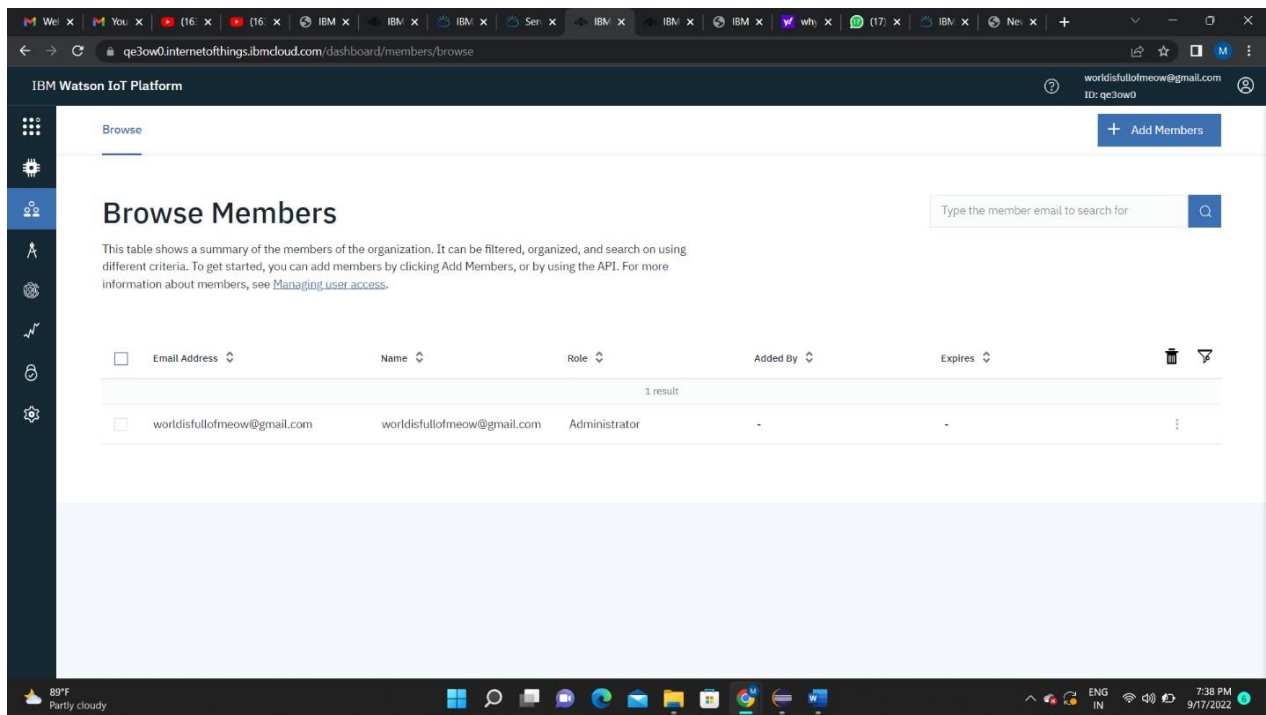

13. In the security tab we can choose the type of security connection and can change according to specification

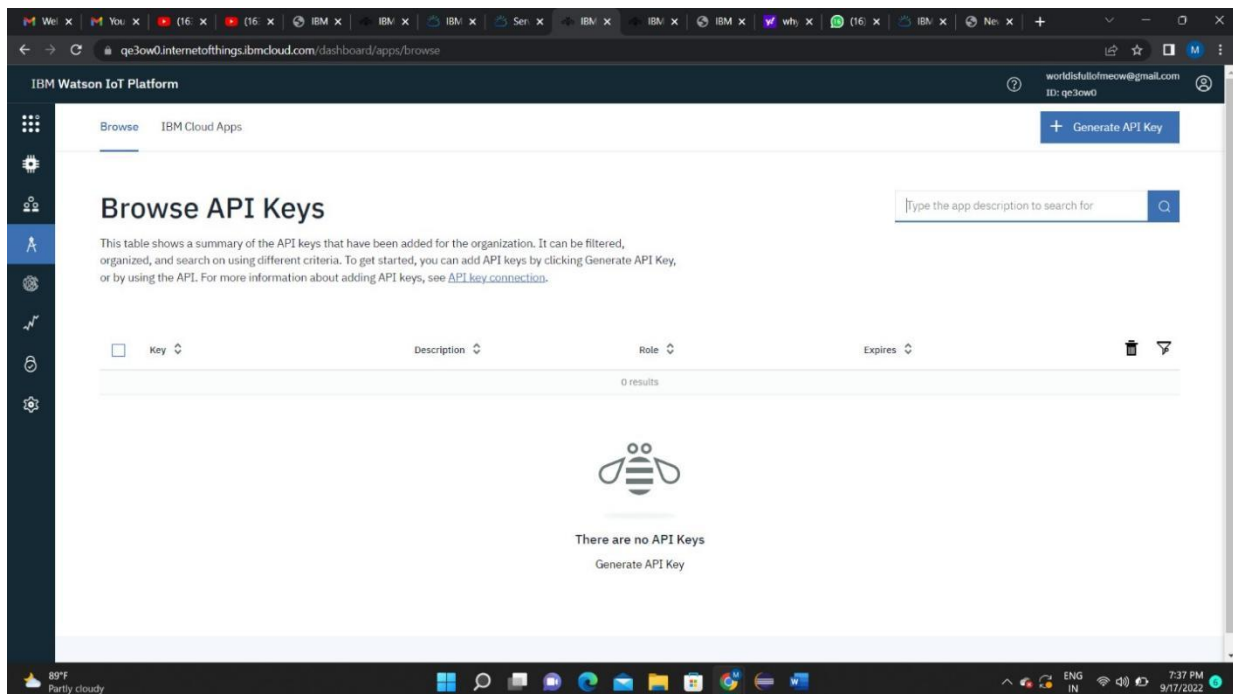

14. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

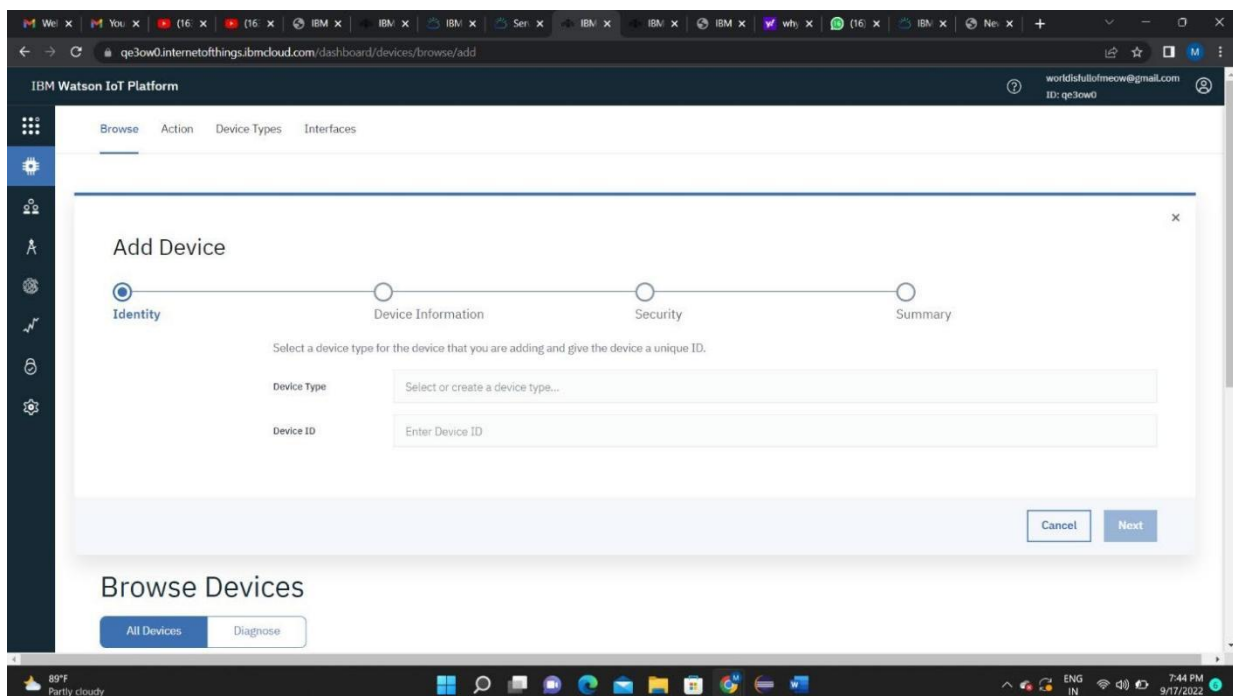

15. The member tab is add the teams members to work in the platform

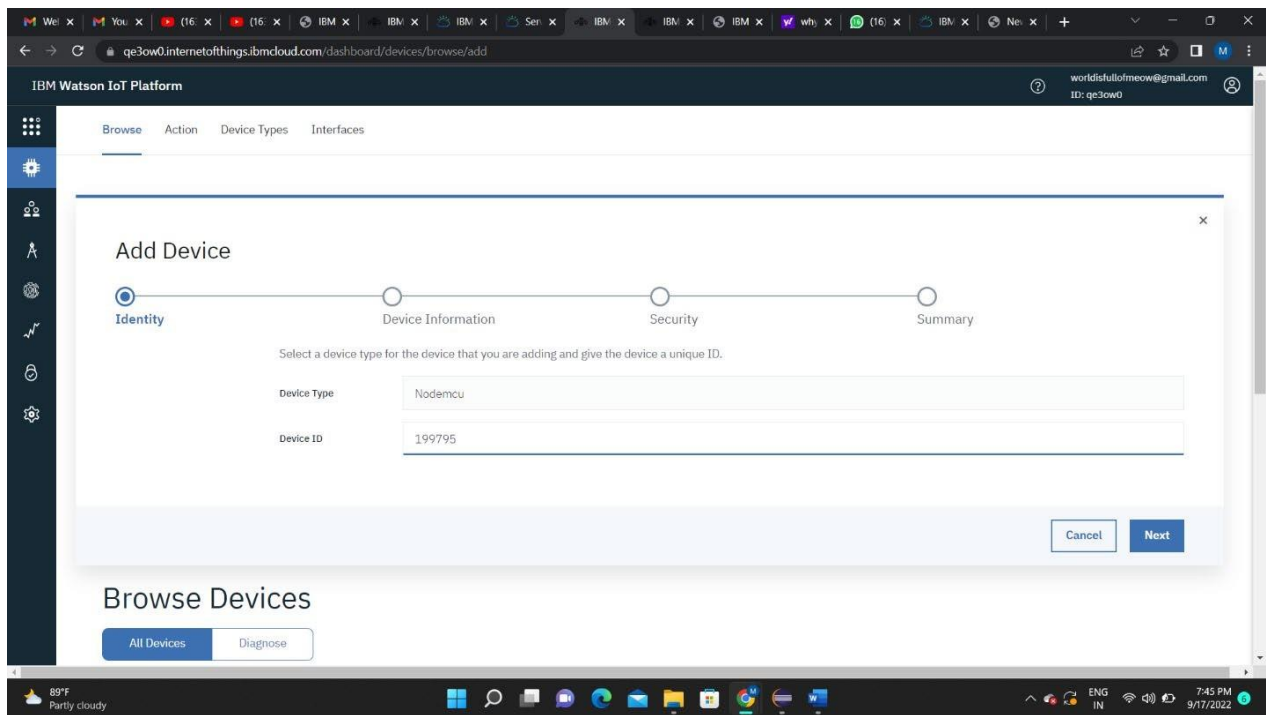

16. This tab is used when you want to connect to some other platform and to integrate with other services.

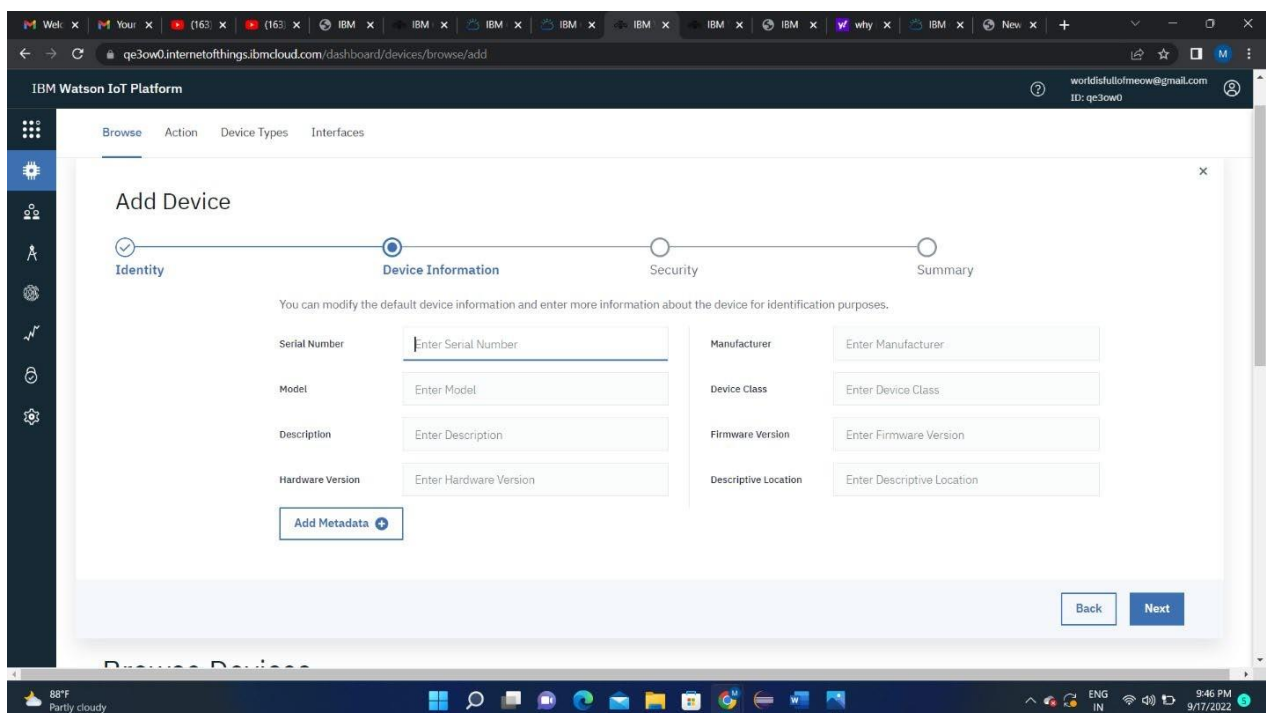

17. Click on the device tab and click on the add device button, then give the device type and device id and click next

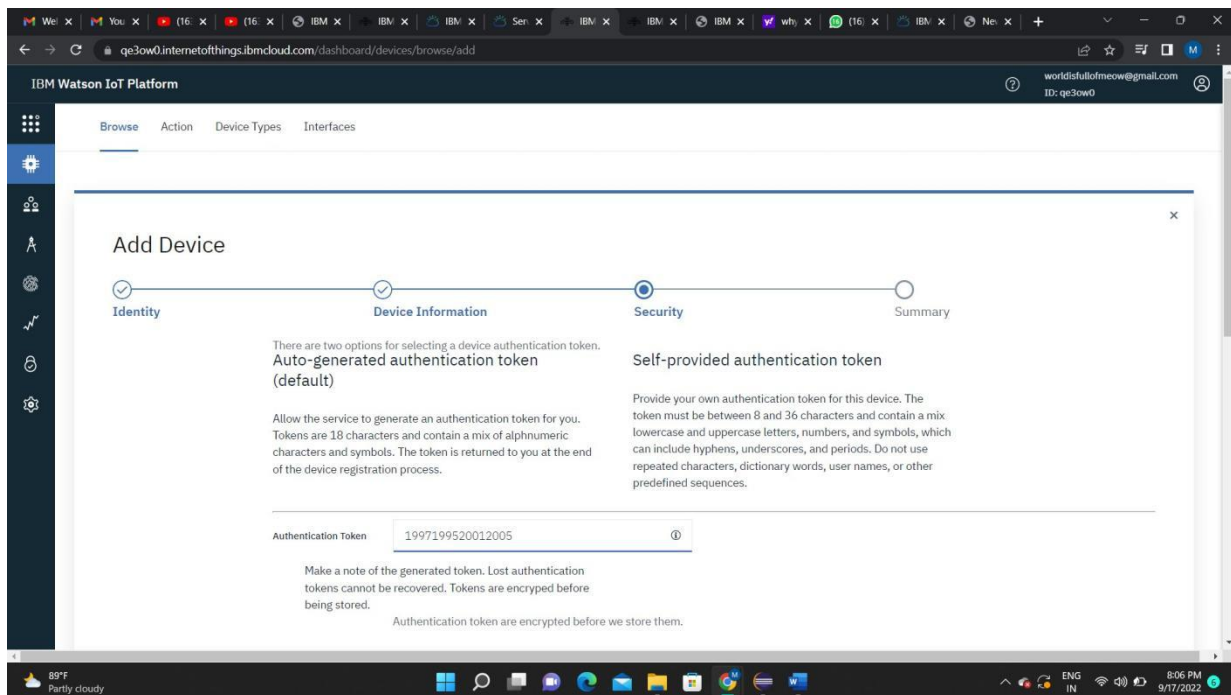

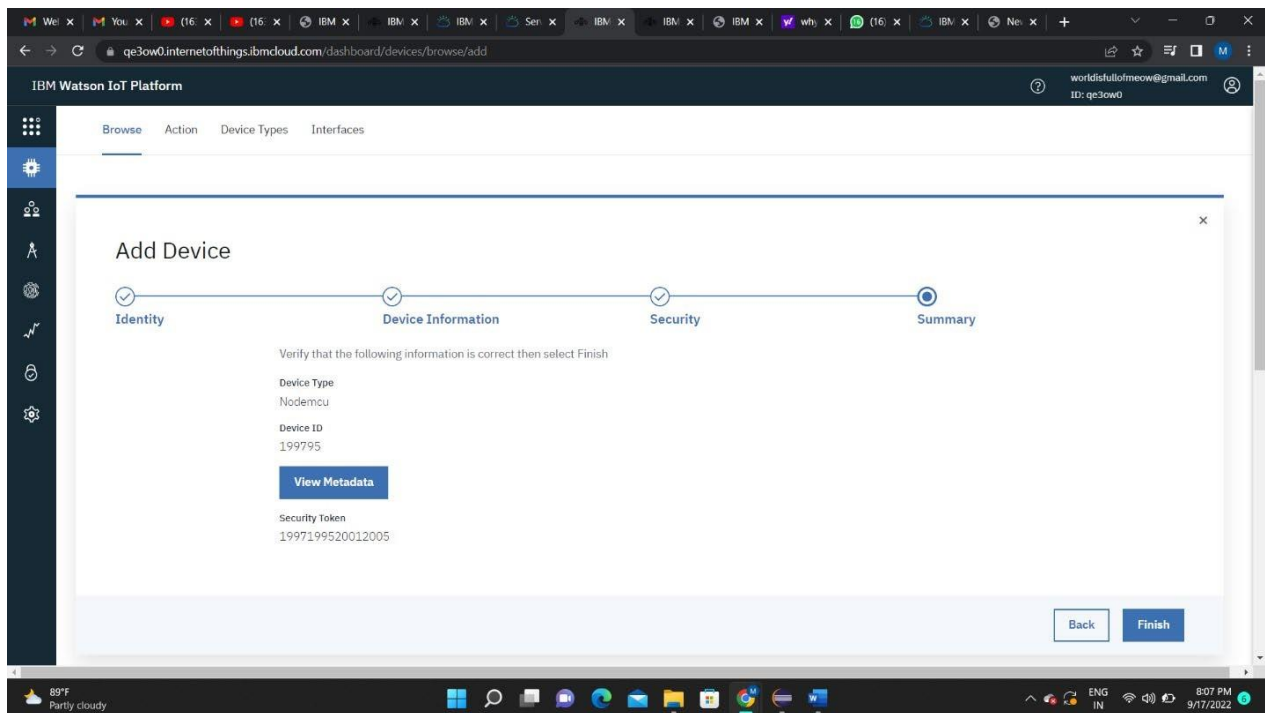

18. This page to enter extra details and of the hardware

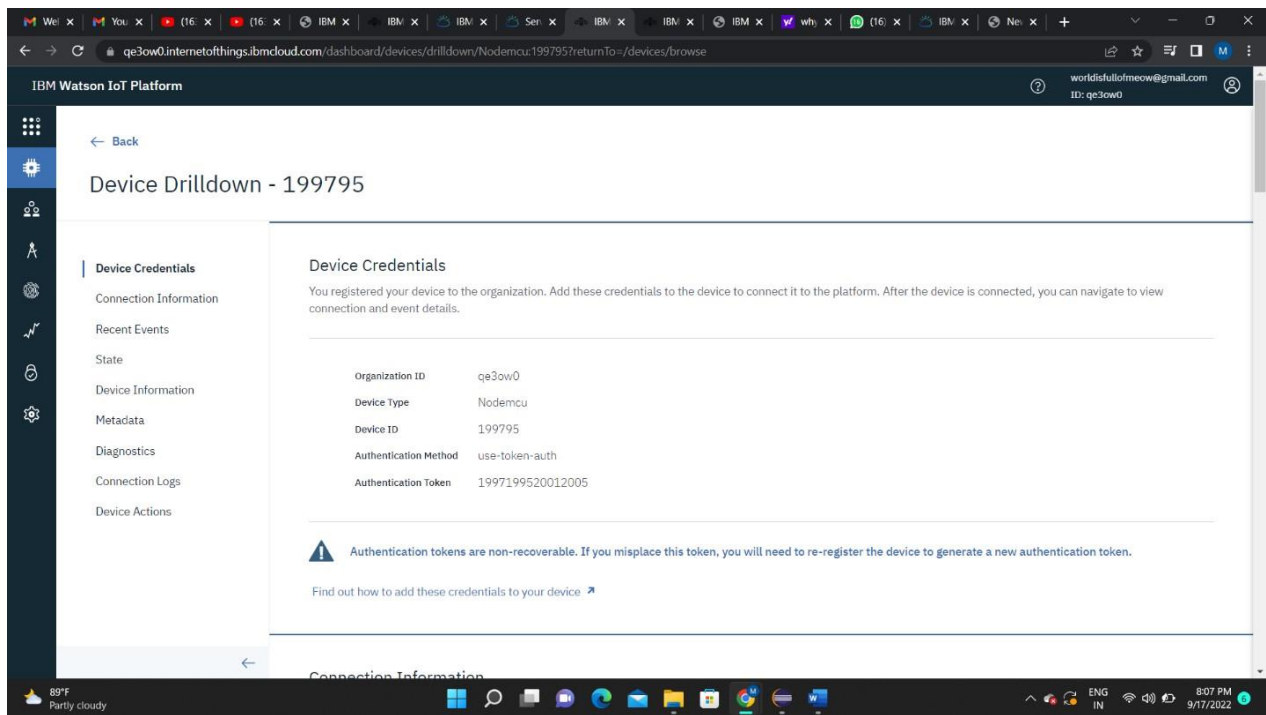

19. Clicking next it goes to the security where we do authentication token id.

20. Clicking on next it goes to the summary of the device then click finish

21. The device credentials will be displayed with all the details

22. Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

23. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is present with the text 'Search by Device ID'. Below the navigation bar, there is a table with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. The table contains one row for a device with ID 199795, status 'Disconnected', and type 'Nodemcu'. Below the table, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected, showing a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: Event, Value, Format, and Last Received. The table is currently empty. At the bottom of the dashboard, there is a status bar showing '89°F Partly cloudy' and a system tray with various icons.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is present with the text 'Search by Device ID'. Below the navigation bar, there is a table with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. The table contains one row for a device with ID 199795, status 'Disconnected', and type 'Nodemcu'. Below the table, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Device Information' tab is selected, showing a list of device details: Device ID (199795), Device Type (Nodemcu), Date Added (17 Sep 2022 20:07), Added By (worldisfulofmeow@gmail.com), and Connection Status (Disconnected). At the bottom of the dashboard, there is a status bar showing '89°F Partly cloudy' and a system tray with various icons.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

24. The Boards will display card for the project.

The image displays two screenshots of the IBM Watson IoT Platform dashboard, illustrating the 'Boards' feature.

Top Screenshot: Your boards view

- The dashboard shows a list of boards under the 'Your boards' tab.
- Two boards are visible: 'Usage Overview' (3 Cards) and 'Risk and Security Overview' (4 Cards).
- A dashed box with a plus sign indicates a placeholder for a new board.
- The bottom section is labeled 'Boards shared with you'.

Bottom Screenshot: Usage Overview card details

- The 'Usage Overview' card is selected, showing a detailed view of device types and data transfer.
- Device types:** A donut chart shows 'Total 1 device' of type 'Nodemcu'.
- Data transferred:** A summary shows '0.2 MB' transferred today, with '0.2 MB' for this month and '0.0 MB' for the previous month.
- Data transferred graph:** A line graph shows the data transfer over time, with a peak of 0.24 MB.
